

A Season of Discovery

Spring.

The end of the thaw, new beginnings. Energy and Growth. A time to rediscover wonder. That's what spring is to me. Even in the cold, grey days after the snow is gone, before things start to green up again, that's when growth is happening. It is waiting, and it's coming!

Simple things we take for granted. Like maple leaves. Most people picture them as they eventually become, fully grown on the tree. Did you know that those leaves started out as tiny miniature versions of themselves? Is there a maple tree in your neighbourhood? Go check it out! Now is the time. It's magical.

Artist Statement

The reward is in the act of observing. Stone colours, textures, the shape of leaves, the ebb and flow of the sea, the changing seasons - all of these things continue to inspire my work. A gesture of thanks and appreciation.

At first it was a technical challenge - to really learn to see the natural world and to develop techniques to capture a sense of it in metal. But as time has passed I am now realizing another purpose: Connection. People connecting to place, places connecting to each other and our shared connection to the world around us.

Almost 20 years ago one of my students said the following to me:

"The moon casts three shadows you know."

I am still thinking about it.
